## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-29, drawn to formatting a group of records, where the format information is stored in a separate location, and displaying a preview in table form; classified in class 715 (Data Processing: Presentation Processing of Document), subclass 522 (Layout – Format Information in a Separate File).
  - II. Claims 40-66, drawn to presenting family data, where the family data is related by a common value and comprises a subset of a hierarchical structure defined by a partition; classified in class 707 (Data Processing: Database And File Management Or Data Structures), subclass 102 (Generating Database or Data Structure).
  - III. Claims 67-93 and 136-171, drawn to dynamically applying a user supplied pivot value to a table of family data to generate a preview table; classified in class 715 (Data Processing: Presentation Processing of Document), subclass 504 (Spreadsheet – Cell Format Control).
  - IV. Claims 94-105, drawn to the use of a graphical user interface for manipulating layout components to format a data table; classified in class 345 (Computer Graphics Processing, Operator Interface Processing, and Selective Visual Display Systems), subclass 764 (Operator Interface (E.G., Graphical User Interface) – On-Screen Workspace or Object).

- V. Claims 106-135, drawn to the preview of a data table generated from user supplied layout information and a group of records; classified in class 715 (Data Processing: Presentation Processing of Document), subclass 527 (Print Preview).
2. This application contains claims directed to the following patentably distinct species of the claimed invention: formatting a group of records, where the format information is stored in a separate location, and displaying a preview in table form (Group I); presenting family data, where the family data is related by a common value and comprises a subset of a hierarchical structure defined by a partition (Group II); dynamically applying a user supplied pivot value to a table of family data to generate a preview table (Group III); the use of a graphical user interface for manipulating layout components to format a data table (Group IV); and the preview of a data table generated from user supplied layout information and a group of records (Group V).
3. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim limitations directed toward applying layout information to a group of records to generate and display a preview table are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all

claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 2178

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
